Claims 1-25 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-18 of copending Application No. 10/892,847. Independent claim 1 of '441 is generic to the more specific species claims of '847 in omitting of using a surfactant, and in not specifying or restricting the water-soluble monomers utilized in the contacting. However, surfactants are commonly used in combination with emulsion compositions or in separating emulsions containing oil. The monomers recited in '847 are common water-soluble monomers or polymers.

Instant claims 3, 5 and 6, and also claims 13-16 even more clearly are obvious variants of claims of '847 in reciting the same or similar Markush groups of monomers or in reciting the step of using a surfactant respectively.

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

These are provisional obviousness-type double patenting rejections because the conflicting claims have not in fact been patented.

ALLOWABLE SUBJECT MATTER

Pending resolution of double patenting rejection, independent claim 1 remains distinguished by the recitation of "contacting...prior to contact with said oil-based mud ***[and]*** wherein the ***emulsion comprises polymer particles of*** average discrete phase particle size ***of [the polymer] less than about 10 microns...***" ***It is acknowledged that neither of the applied prior art references, Chen or Thompson, suggest such polymer particles applied to separate solids from liquid in an oil-based mud.***
